

ANDROID PROGRAMS

YUVAKSHETRA INSTITUTE OF MANAGEMENT STUDIES

2020

1. Hello World Program (Write a program to Toast Hello World)

Activity Main.Xml File

```
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity" >

    <Button
        android:id="@+id/buttonToast"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_marginLeft="44dp"
        android:layout_marginTop="74dp"
        android:text="Show Toast" />
    </RelativeLayout>
```

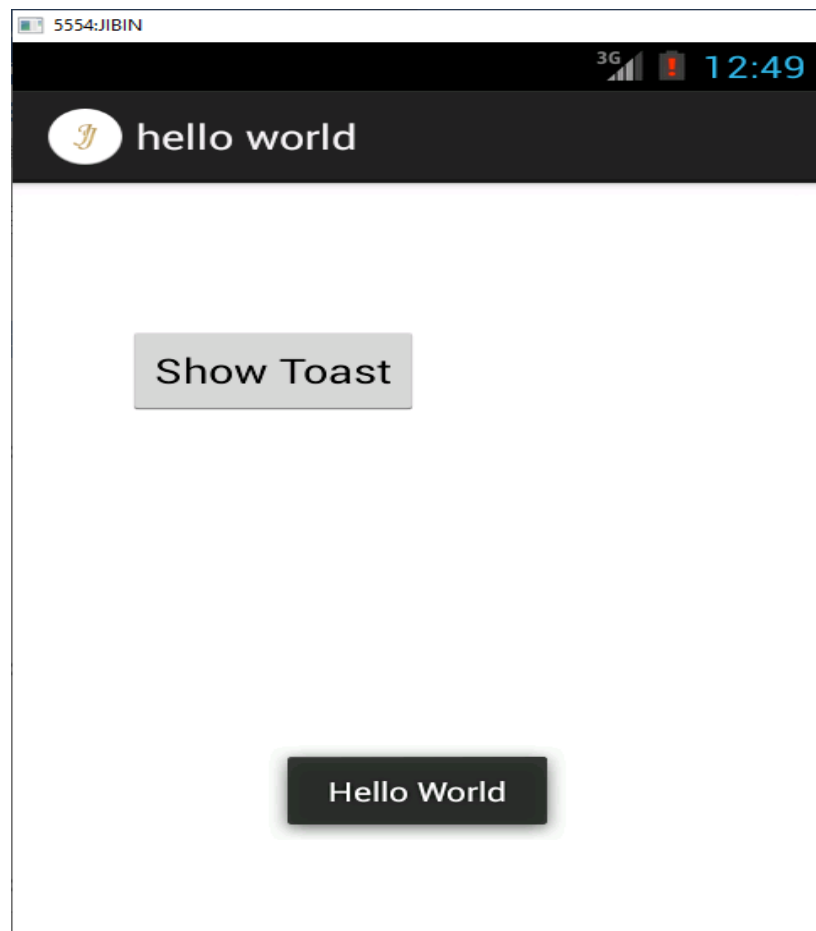

MainActivity.java file

```
import android.os.Bundle;
import android.widget.Button;
import android.widget.Toast;
import android.app.Activity;
import android.view.Menu;
import android.view.View;
import android.view.View.OnClickListener;

public class MainActivity extends Activity {
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        Button button = (Button) findViewById(R.id.buttonToast);
```

```
button.setOnClickListener(new OnClickListener() {  
    public void onClick(View arg0) {  
        Toast.makeText(getApplicationContext(),  
            "Hello World", Toast.LENGTH_LONG).show();  
    }  
});  
}
```

OUTPUT

2. Addition of two Numbers (Write a program to add two numbers)

Activity Main.Xml File

```

<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity" >

    <TextView
        android:id="@+id/textView1"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_alignParentTop="true"
        android:layout_centerHorizontal="true"
        android:layout_marginTop="97dp"
        android:text="Addition"
        android:textAppearance="?android:attr/textAppearanceMedium" />
    <TextView
        android:id="@+id/textView2"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_alignParentLeft="true"
        android:layout_below="@+id/textView1"
        android:layout_marginLeft="20dp"
        android:layout_marginTop="43dp"
        android:text="Number One"
        android:textAppearance="?android:attr/textAppearanceMedium" />
    <EditText
        android:id="@+id/txtNumber1"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_alignBottom="@+id/textView2"
        android:layout_alignRight="@+id/textView1"
        android:ems="2"
        android:inputType="number" >

```

```

<requestFocus />
</EditText>
<TextView
    android:id="@+id/textView3"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_alignLeft="@+id/textView2"
    android:layout_below="@+id/textView2"
    android:layout_marginTop="47dp"
    android:text="Number Two"
    android:textAppearance="?android:attr/textAppearanceMedium" />

```

```

<Button
    android:id="@+id/btnAdd"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_alignLeft="@+id/textView3"
    android:layout_alignRight="@+id/textView3"
    android:layout_below="@+id/textView3"
    android:layout_marginTop="46dp"
    android:text="Add" />

```

```

<EditText
    android:id="@+id/txtNumber2"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_above="@+id/btnAdd"
    android:layout_alignLeft="@+id/txtNumber1"
    android:ems="2"
    android:inputType="number" />
<TextView
    android:id="@+id/txtResult"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_alignRight="@+id/txtNumber2"
    android:layout_alignTop="@+id/btnAdd"

```

```
android:textAppearance="?android:attr/textAppearanceMedium" />
</RelativeLayout>
```

MainActivity.java file

```
import android.os.Bundle;
import android.app.Activity;
import android.view.Menu;
import android.view.View;
import android.view.View.OnClickListener;
import android.widget.Button;
import android.widget.EditText;
import android.widget.TextView;
public class MainActivity extends Activity {
    EditText firstNumber;
    EditText secondNumber;
    TextView addResult;
    Button btnAdd;
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        firstNumber = (EditText)findViewById(R.id.txtNumber1);
        secondNumber = (EditText)findViewById(R.id.txtNumber2);
        addResult = (TextView)findViewById(R.id.txtResult);
        Button btnAdd = (Button)findViewById(R.id.btnAdd);
        btnAdd.setOnClickListener(new OnClickListener() {
            public void onClick(View v) {
                double num1 = Double.parseDouble(firstNumber.getText().toString());
                double num2 = Double.parseDouble(secondNumber.getText().toString());
                double sum = num1 + num2;
                addResult.setText(Double.toString(sum));
            }
        });
    }
}
```

OUTPUT

The screenshot shows an Android application interface. At the top, the status bar displays '5554:JIBIN', '3G' signal, a battery icon, and the time '1:01'. Below the status bar is a dark header with a circular logo containing a stylized 'J' and the text 'addition'. The main content area has a title 'Addition' centered at the top. Below the title, there are two input fields: 'Number One' with the value '10' and 'Number Two' with the value '20'. Below these fields is a grey button labeled 'Add'. To the right of the 'Add' button, the result '30.0' is displayed.

Addition	
Number One	10
Number Two	20
Add	30.0

3. Alert Box (Write a program to Display an alert box with OK and Cancel)

Activity Main.Xml File

```
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity" >

    <Button
        android:id="@+id/buttonAlert"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_centerHorizontal="true"
        android:layout_centerVertical="true"
        android:text="Show Alert Box" />

</RelativeLayout>
```

MainActivity.java file

```
import android.app.Activity;
import android.app.AlertDialog;
import android.content.Context;
import android.content.DialogInterface;
import android.os.Bundle;
import android.view.Menu;
import android.view.View;
import android.view.View.OnClickListener;
import android.widget.Button;

public class MainActivity extends Activity {
    final Context context = this;
    private Button button;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
```

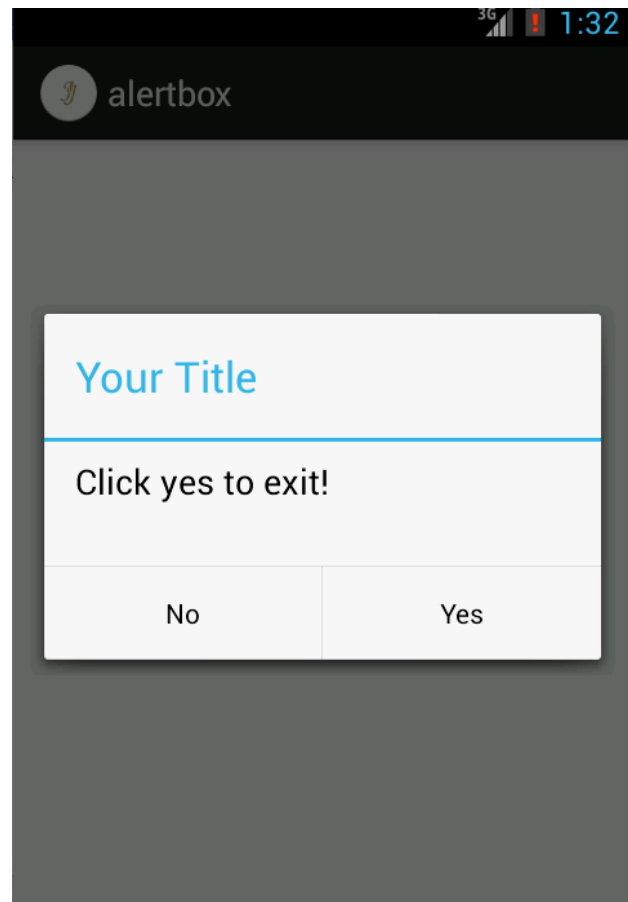

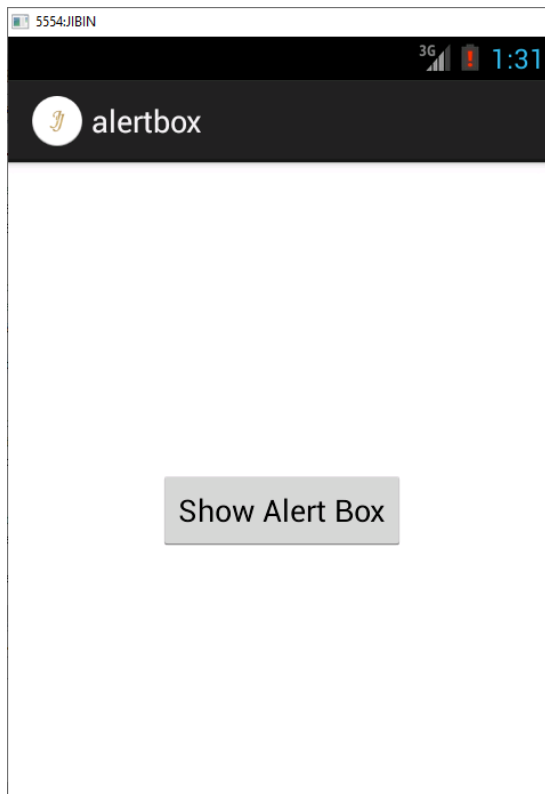

```

setContentView(R.layout.activity_main);
button = (Button) findViewById(R.id.buttonAlert);
button.setOnClickListener(new OnClickListener() {
@Override
public void onClick(View arg0) {
AlertDialog.Builder alertDialogBuilder = new AlertDialog.Builder(context);
    alertDialogBuilder.setTitle("Your Title");
    alertDialogBuilder.setMessage("Click yes to
exit!").setCancelable(false).setPositiveButton("Yes",new DialogInterface.OnClickListener()
{
public void onClick(DialogInterface dialog,int id) {
    MainActivity.this.finish();
}
}).setNegativeButton("No",new DialogInterface.OnClickListener()
{
public void onClick(DialogInterface dialog,int id)
{
    dialog.cancel();
}
});

AlertDialog alertDialog = alertDialogBuilder.create();
alertDialog.show();
}
});
}

```

OUTPUT

4. Menu Program(Write a Program to create menu with three menu items)

Activity Main.Xml File

```
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity" >

    <TextView
        android:id="@+id/textView1"
        android:layout_width="fill_parent"
        android:layout_height="wrap_content"
        android:layout_alignParentLeft="true"
        android:layout_alignParentTop="true"
        android:layout_marginTop="70dp"
        android:text="Category:" />

    <Spinner
        android:id="@+id/spinner"
        android:layout_width="fill_parent"
        android:layout_height="wrap_content"
        android:layout_alignParentLeft="true"
        android:layout_below="@+id/textView1"
        android:layout_marginTop="38dp"
        />

</RelativeLayout>
```

MainActivity.java file

```

        listView.setAdapter(adapter);
    }
}
```

OUTPUT

10.Fetch data from an EditText and display it in a TextView

Activity Main.Xml File

```
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity" >
```

<EditText

```
    android:id="@+id/editText1"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_alignParentTop="true"
    android:layout_centerHorizontal="true"
    android:layout_marginTop="62dp"
    android:ems="10" />
```

<EditText

```
    android:id="@+id/editText2"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_below="@+id/editText1"
    android:layout_centerHorizontal="true"
    android:layout_marginTop="18dp"
    android:ems="10" />
```

<TextView

```
    android:id="@+id/textView1"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_alignParentBottom="true"
    android:layout_centerHorizontal="true"
    android:layout_marginBottom="107dp" />
```

```

<Button
    android:id="@+id/button1"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_centerHorizontal="true"
    android:layout_centerVertical="true"
    android:text="Click Here" />

</RelativeLayout>

```

MainActivity.java file

```
package com.example.fetchdata;
```

```

import android.os.Bundle;
import android.app.Activity;
import android.view.Menu;
